SENIOR CREATIVE DIRECTION
ACROSS PROJECTS

Designed with execution in mind.

NOBÉL's strength lies in developing highly individual interiors while maintaining control over how the approved vision is translated into the built result - even across large projects with complex custom production and multiple teams.

Documentation is the common language connecting the project team.

Built on years of implementation experience, NOBÉL's detailed documentation gives architects, engineers, contractors and manufacturers one coordinated set of information to work from.

VISION → DESIGN → DOCUMENTATION → BESPOKE → PRODUCTION →
COORDINATION → BUILT RESULT

When the right solution does not exist, we develop it.

Highly individual interiors often require solutions that simply do not exist as ready-made products. NOBÉL develops elements specifically for the project - for individuality, quality, functional fit and consistency with the overall design vision.

BESPOKE DEVELOPMENT

Custom furniture, stone, millwork, metalwork, lighting and architectural details are developed specifically for the residence, with documentation carried through technical development and fabrication.

INTERNATIONAL PRODUCTION

NOBÉL works extensively with specialized European manufacturers, including Italian factories, coordinating technical solutions, samples, fabrication, logistics and installation requirements.

SMART SOURCING

The team compares craftsmanship, technical feasibility, manufacturing capability, lead time, logistics and total project cost - not simply the nearest or most expensive supplier.

AVALON

Avalon demonstrates the scale of coordination behind a major NOBÉL project - combining extensive bespoke development, detailed documentation, international production, complex logistics and hundreds of specialists within one coordinated system.

NOBÉL in brief

NOBÉL is an international interior architecture studio specializing in complex high-end residential and commercial projects. The studio combines strong creative direction, bespoke development, detailed documentation, international production experience and multidisciplinary coordination to carry the approved vision through to the finished result.

LOS ANGELES · DUBAI · WARSAW · PROJECTS WORLDWIDE

CAN YOU WORK WITH OUR ARCHITECT OR CONTRACTOR?

Yes. NOBÉL regularly coordinates with architects, engineers, contractors and manufacturers as part of multidisciplinary project teams.

DO YOU DEVELOP CUSTOM ELEMENTS AND COORDINATE PRODUCTION?

Yes. Bespoke development is a major part of many projects, with custom production coordinated with specialist manufacturers and installers as needed.

DO YOU BUILD THE PROJECT?

NOBÉL leads the design and coordination process and works alongside the construction team rather than acting as general contractor.

HOW ARE FEES AND TIMING DEFINED?

Scope, timing and fees are defined individually after the team reviews the property, project stage and required services.
